- Parts

Founded in 1961, B.L. Anderson Company, Inc. was formed to serve the environmental processing industry, representing some of the world's best manufacturers of water and wastewater treatment equipment. We have continued to build our business to become a highly effective representative of these leading manufacturers, and a reliable resource to our clients in the fields of both supply and service.

BL Anderson boasts the broadest range of design and engineering expertise and perspective with in-depth coverage of every facet of your utility or project. Once complete, BL Anderson can meet the needs of your equipment, remotely or on site, featuring an elite group of highly trained and skilled field technical specialists. In fact, we have 29 professionals with hundreds of years of collective service to the water and wastewater industry!
